- CSS
- UI/UX (Figma)

- Communication
- Problem solving

### PROFILE

My name Muhammad Rifky Fadillah, a motivated and detail-oriented Junior Frontend Developer with a strong passion for creating clean, intuitive, and accessible user interfaces. I have a solid understanding of web development principles and am committed to continuous learning and improvement. I work well both independently and as part of a team to deliver high-quality user experiences.

### PROJECT EXPERIENCE

#### Monefy

2025

A simple app to record income and expenses, helping users track their daily finances and manage spending effectively.

#### SISFO-SARPAS

2025

A web-based system to manage and track school assets, including adding, updating, and monitoring inventory items efficiently.

#### Quick-shop

2025

A web-based platform that allows users to browse products, add items to cart, and make secure purchases online.

#### GoodFood

2024

A responsive web platform where users can browse menus, place food orders online, and receive real-time order updates.

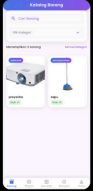

#### Starbhak-Mart

2024

An easy-to-use app for browsing restaurant menus, placing food orders, and managing transactions with real-time order tracking.

# PROJECT PORTFOLIO

## SISFO-SARPAS

Sisfo sarpas is a web-based application I developed to manage the process of borrowing and returning school assets such as equipment, tools, or other inventory items.

[see Project ...](#)

## MONEYFY

A cross-platform mobile application for recording income and expenses. The app allows users to log daily financial transactions, categorize them, and view summaries to better manage personal finances. Built with Flutter to ensure smooth performance on both Android and iOS devices.

[see Project ...](#)

## QUICK-SHOP

This project is designed to provide a seamless online shopping experience for users while giving administrators a powerful and user-friendly interface to manage the store. To handle secure and efficient transactions, Xendit is integrated as the payment gateway, supporting multiple payment methods including e-wallets, virtual accounts, and credit cards. The platform includes inventory management, order tracking, customer management, and comprehensive analytics.

[see Project ...](#)

## GOODFOOD

This project aims to simplify the food ordering process within a school environment by allowing users to browse menus, place orders, and manage transactions online through a clean and responsive interface. The application features user authentication, order management, payment processing, and an admin dashboard for managing menus and orders. Built with Laravel's robust framework, it ensures security and scalability.

[see Project ...](#)

## STARBHAK MART

Starbhak-Mart a mobile food ordering application built using Flutter for the frontend and Supabase as the backend service and database.
